

# MAKENA DIVE CONDITIONS

PRESENTED BY THE DIVE STAFF OF SCUBA LUV MAUI  
MAKENA BEACH & GOLF RESORT  
BEACH ACTIVITY DESK  
(808) 870-2738

## PICTURE OF THE WEEK!

**COMMERSON FROGFISH** –Larger than most frogfishes, this species can be yellow, orange, red, brown or black. It can change it's color to blend in with it's environment mimicking sponges and other organisms. This little guy was only about 2" long but easy to spot because of his bright color!

**DATE OF REPORTING:** JULY 5, 2011

**AIR TEMPERATURE:** 85 degrees

**WATER TEMPERATURE:** 77 degrees

**VIZIBILITY:** 60'

**STAFF COMMENTS:** RIGHT ON SCHEDULE! The annual coral spawning in Maui !!! Typically two to three days after the "new moon" every July, and it happened last week. "YES", our water was a bit cloudy but the good news is our reefs are healthy and the hope of new life is in the water! The circle of life continues! Don't pollute! Give that coral a chance to grow!
