## CRITTER(S) OF THE WEEK!

**Bluestripe Butterfly ( “kikakapu) & Crowned Toby ( “pu u olai”)- Found only in Hawaii; unlike most endemics that resemble species found elsewhere, this guy has no close relative and is truly unique; quite curious as is it’s little friend, the Crowned Toby. The Crowned Toby is usually found in depths greater than 20’ and typically travels in pairs. This guy was without a partner and maybe interested in this curious butterfly???? Our most memorable dives are when species interact and we are there to capture the shot!**

**DATE OF REPORTING: NOVEMBER 7, 2011**  
**AIR TEMPERATURE: 86 degrees**  
**WATER TEMPERATURE: 80 degrees**  
**VIZIBILITY: 150’ +**
