CRITTER OF THE WEEK!

BLUE SPOTTED URCHIN-Very uncommon in Hawaii and something we have never seen in 30+ years of diving; inhabits depths of 50' or more; spines are hair-like and very toxic; spineless areas contains rows of iridescent blue spots that can expand and contract; grows to about 8" across! What a rare find and we found it at Makena on Christmas Eve....

DATE OF REPORTING: DECEMBER 25, 2011

AIR TEMPERATURE: 81 degrees

WATER TEMPERATURE: 76 degrees

VIZIBILITY: 100' +
