

SCUBA LUV MAUI DIVE REPORT

KEAWAKAPU BEACH

“CRITTER OF THE WEEK”

(808) 870-2738

IRIDESCENT FIREWORM— (“aha huluhulu”) This iridescent fire worm lives under rocks in shallow water and grows to about 6”.

We were traveling across the reef and in a sand patch we came across this nest of fireworms, feeding on a whip eel. The main aggressor was trying desperately to ingest this huge meal!
